

TABLE OF IMPACTS OF THE ROSSETI GROUP

GRI 2–24, 2–25, 3–3, 203–2

№	Material topic	Actual and potential, negative and positive impact on the economy, environment and people			Policy or commitments in relation to the material topic are enshrined in the following corporate documents:	Actions taken to manage the topic and associated impacts, including:	Measures to track the effectiveness of the actions taken:
		i. Impact type and description	ii. Time frame for risk or opportunity realization	iii. Type of resource or a stakeholder affected by risk/opportunity realization			
1	Providing reliable and uninterrupted power supply	Actual positive impacts on the economy and people: - availability and high quality of power supply to consumers, expansion of the service area - reducing the risks of damage and mass power outages during operation in abnormal weather conditions	Medium-term	Consumers	- Development Strategy of Rosseti PJSC, its subsidiaries and affiliates until 2030 - Digital Transformation Strategy of the Rosseti Group for the period of 2025–2027 and forecast indicators until 2030 - Rosseti PJSC's Regulations on the Uniform Technical Policy - Rosseti PJSC's Innovative Development Program (IDP) for the period from 2024 through 2029 with an outlook until 2035 - Energy Saving and Energy Efficiency Program - Uniform Rules for Prevention and Elimination of Consequences of Technological Disturbances (Accidents) at Power Grid Facilities	- Increasing the efficiency of all processes, including in terms of interaction with consumers - Construction and upgrading of infrastructure facilities - Completing the maintenance program in a timely manner - Implementing energy security measures as part of the Digital Transformation Strategy of the Rosseti Group for the period of 2024–2027 and forecast indicators until 2030	- Measuring and monitoring the System Average Interruption Duration Index (Psaidi) and the System Average Interruption Frequency Index (Psaifi) - Assessing the reliability of services established by tariff regulation authorities
2	Contribution to social and economic development in the regions of operation	Actual and potential positive impacts on the economy: - ensuring employment in the regions of operation - paying taxes and social contributions - facilitating industry and infrastructure development - implementing national projects	Medium-term	Employees, suppliers and counterparties, business partners, consumers, government authorities, local communities, media, non-profit organizations	- Development Strategy of Rosseti PJSC, its subsidiaries and affiliates until 2030 - Investment programs of Rosseti PJSC and its subsidiaries - Sustainability Policy of Rosseti PJSC - Standard Regulations for Formation and Amendment of the Investment Program and Preparation of Reports on Implementation of the Investment Program, Improvement of Investment Efficiency and Reduction of Costs in Rosseti PJSC's Subsidiaries - Industry-Wide Tariff Agreement (IWTA)	- Providing people with jobs with good remuneration and social benefits - Stakeholder engagement - Connecting important social facilities (healthcare and educational institutions, public utilities) - Contributing to regional and local budgets through paying taxes and social contributions	- Monitoring the implementation of the investment program - Monitoring compliance with agreements on the terms and conditions for conducting regulated activities (regulatory agreements) with the regions where the Company operates - Monitoring timely payment of taxes to budgets at all levels

TABLE OF IMPACTS OF THE ROSSETI GROUP

№	Material topic	Actual and potential, negative and positive impact on the economy, environment and people			Policy or commitments in relation to the material topic are enshrined in the following corporate documents:	Actions taken to manage the topic and associated impacts, including: i. actions to prevent or mitigate potential negative impacts; ii. actions to remedy actual negative impacts, including support and cooperation in remedial work; iii. actions to manage actual and potential positive impacts.	Measures to track the effectiveness of the actions taken: i. processes used to track the effectiveness of the actions; ii. goals, targets and indicators used to measure the progress.
		i. Impact type and description	ii. Time frame for risk or opportunity realization	iii. Type of resource or a stakeholder affected by risk/opportunity realization			
3	Occupational health and safety	Actual and potential negative impacts on people: - injuries and fatalities among employees and contractors Actual positive impact: - promoting better health among employees	Short-term	Employees, suppliers and contractors	- Regulations on the Occupational Health and Safety Management System of the Rosseti Group - HR Management Rules in Power Industry Organizations of the Russian Federation - Sustainability Policy of Rosseti PJSC - Regulations on the Social Benefits for Employees of the Executive Office of Rosseti PJSC and Its Branches—MPGs, MPGEs and the Technical Supervision Center	- Implementing and continuously improving the unified occupational health and safety management system in the Rosseti Group - Organizing the implementation of the Comprehensive Program to Reduce the Risk of Personnel Injuries of Rosseti PJSC’s Subsidiaries and Affiliates - Approving organizational and administrative documents related to occupational health and safety - Conducting periodic control of work safety in electrical installations - Developing and improving OHSMS standards - Promoting a healthy lifestyle and supporting corporate sports - Providing employees with corporate health insurance programs	Conducting external diagnostic audit and assessment of the implementation and development of OHSMS.
4	Cybersecurity and data protection	Potential negative consequences for people and the economy: - hacking - damage to the internal IT infrastructure, both hardware and software - data leak, etc.	Medium-term	Employees, suppliers and counterparties, business partners, consumers, government agencies	- Digital Transformation Strategy of the Rosseti Group for the period of 2025–2027 and forecast indicators until 2030 - Rosseti PJSC’s Innovative Development Program (IDP) for the period from 2024 through 2029 with an outlook until 2035	- Ensuring information security and cyber resilience of information and telecommunication systems, and automated control systems - Implementing R&D projects aimed at improving information security - Implementing projects on creating an integrated intelligent information security system for the power grid sector by the Rosseti Group companies	- Assessing integration of digital technologies into business processes - Assessing resilience of the internal IT infrastructure to external impacts - Analyzing the cybersecurity system performance.

TABLE OF IMPACTS OF THE ROSSETI GROUP

№	Material topic	Actual and potential, negative and positive impact on the economy, environment and people			Policy or commitments in relation to the material topic are enshrined in the following corporate documents:	Actions taken to manage the topic and associated impacts, including: i. actions to prevent or mitigate potential negative impacts; ii. actions to remedy actual negative impacts, including support and cooperation in remedial work; iii. actions to manage actual and potential positive impacts.	Measures to track the effectiveness of the actions taken: i. processes used to track the effectiveness of the actions; ii. goals, targets and indicators used to measure the progress.
		i. Impact type and description	ii. Time frame for risk or opportunity realization	iii. Type of resource or a stakeholder affected by risk/opportunity realization			
5	Talent development	Potential negative impacts on people and the economy: • failure to use the potential for increasing performance • shortage of qualified personnel • staff turnover in certain categories • social unrest • decline in employee motivation and employee skills Actual positive impact: • facilitating the development of professional and personal potential	Medium-term	Employees	• Regulations on the Social Benefits for Employees of the Executive Office of Rosseti PJSC and Its Branches—MPGs, MPGEs and the Technical Supervision Center • Regulations on Management Talent Pool Development in the Rosseti Group of Companies • Regulations on Talent Pool Management of the Rosseti Group of Companies • Regulations on personnel record management and the procedure for completing the probation period in the process of hiring and mentoring • Recommendations for Implementation of Professional Standards in the Rosseti Group Operations • Code of Corporate Ethics and Official Conduct of Employees of Rosseti PJSC • Collective bargaining agreements	• Performing work aimed at talent pool formation and development with involvement of promising and motivated employees • Ensuring the involvement of employees in continuous on-the-job training, including through creation of the unified centralized educational platform of the Rosseti Group; development of mentoring; • Holding corporate competitions and contests • Developing the system for independent regular qualification assessment of the Rosseti Group employees and graduates of specialized educational institutions, as well as the talent pool (HR) management system • Implementing the program on ensuring staff mobility and rotation • Holding regular meetings of employees and executives • Interacting with trade unions	• Assessing staff turnover and personnel structure • Analyzing the programs for training, retraining and advanced training of employees
6	R&D and innovation	Potential negative consequences for the economy and people: • stagnation in technologies • decrease in the Company's performance • decrease in financial and operational indicators • decline in the quality of services provided • incidents and accidents at the facilities Actual positive impact on the economy: • strengthening the technological sovereignty of the country	Medium-term	Government agencies, consumers, investors and shareholders, employees	• Digital Transformation Strategy of the Rosseti Group for the period of 2025–2027 and forecast indicators until 2030 • Innovative Development Policy of Rosseti PJSC • Rosseti PJSC's Innovative Development Program (IDP) for the period from 2024 through 2029 with an outlook until 2035	• Implementing projects on digital transformation of various areas of business • Developing the Smart Digital Grid Laboratory project • Cooperating with Russian technology and industrial companies	• Analyzing the Innovative Development Program implementation • Maintaining a Technology Register covering key areas of innovative development and a list of innovative products • Analyzing loss during electricity transmission • Assessing the changes in operational and financial indicators

TABLE OF IMPACTS OF THE ROSSETI GROUP

№	Material topic	Actual and potential, negative and positive impact on the economy, environment and people			Policy or commitments in relation to the material topic are enshrined in the following corporate documents:	Actions taken to manage the topic and associated impacts, including: i. actions to prevent or mitigate potential negative impacts; ii. actions to remedy actual negative impacts, including support and cooperation in remedial work; iii. actions to manage actual and potential positive impacts.	Measures to track the effectiveness of the actions taken: i. processes used to track the effectiveness of the actions; ii. goals, targets and indicators used to measure the progress.
		i. Impact type and description	ii. Time frame for risk or opportunity realization	iii. Type of resource or a stakeholder affected by risk/opportunity realization			
7	Procurement activities	Actual positive impacts on people and the environment: - procurement transparency in the Rosseti Group - selecting suppliers acting in good faith, involving local suppliers, as well as representatives of small and medium-sized enterprises - promoting ethical standards and sustainability practices in the supply chain - facilitating the import substitution process	Medium-term	Suppliers and contractors	- Uniform Procurement Standard of Rosseti PJSC; - SME partnership program of Rosseti PJSC - Program to develop small and medium-sized enterprises (SMEs) to provide for their potential participation in the procurement of goods, work and services - Regulations and rules for the operation of the Central Procurement Commission of Rosseti PJSC	- Improving the quality of Rosseti PJSC procurement management in accordance with the principles set forth in the Uniform Procurement Standard of Rosseti PJSC - Conducting procurement in accordance with current statutory requirements	KPIs of Rosseti PJSC executives: Share of contracts awarded following procedures conducted electronically
8	Safeguarding human rights	Potential negative consequences for people: - unsafe working conditions, high risk of injury - risk of social unrest in case of power outages caused by accidents - harm to human health and environment caused by realization of environmental risks, for example, improper waste disposal, discharge of hazardous substances into water bodies - discrimination on the basis of race, gender, etc. - risk of human rights violation in relation to external stakeholders Actual positive consequences: - creating a safe and inclusive working environment - building up employee trust and increasing engagement - reducing reputational and legal risks	Medium-term	Employees, consumers, suppliers and counterparties, local communities	- Rosseti PJSC Human Rights Policy - Code of Corporate Ethics and Official Conduct of Employees of Rosseti PJSC - Collective bargaining agreements - Anti-Corruption Policy of Rosseti PJSC and Rosseti PJSC subsidiaries and affiliates	- Ensuring a high level of social benefits, social protection programs, and corporate support for employees - Ensuring timely and objective consideration of all appeals received from employees and other stakeholders regarding possible violations of human rights - Implementing measures to remedy and prevent violations	- Analyzing stakeholder appeals lodged via the Hotline and other forms of communication, including analysis of consumer appeals and tracking the level of their satisfaction - Assessing the direct and indirect environmental, economic and social impact on the population in the regions of operation as a result of implementing investment projects - Monitoring satisfaction of employees with working conditions, remuneration, benefits and other types of compensation

№	Material topic	Actual and potential, negative and positive impact on the economy, environment and people			Policy or commitments in relation to the material topic are enshrined in the following corporate documents:	Actions taken to manage the topic and associated impacts, including: i. actions to prevent or mitigate potential negative impacts; ii. actions to remedy actual negative impacts, including support and cooperation in remedial work; iii. actions to manage actual and potential positive impacts.	Measures to track the effectiveness of the actions taken: i. processes used to track the effectiveness of the actions; ii. goals, targets and indicators used to measure the progress.
		i. Impact type and description	ii. Time frame for risk or opportunity realization	iii. Type of resource or a stakeholder affected by risk/opportunity realization			
9	Contribution to low-carbon development and improved energy efficiency	Actual positive impact on the environment and the economy: - reducing the environmental impact of operations - increasing the Company's resistance to changes in climate and the regulatory environment	Long-term	All stakeholder groups	- Development Strategy of Rosseti PJSC, its subsidiaries and affiliates until 2030 - Regulations on the Uniform Technical Policy - Environmental Policy of Rosseti PJSC - Regulations on the Environmental Management System of Rosseti PJSC - Innovative Development Policy of Rosseti PJSC - Rosseti PJSC's Innovative Development Program (IDP) for the period from 2024 through 2029 with an outlook until 2035 - Energy saving and energy efficiency programs within the Rosseti Group - Climate Change Policy of Rosseti PJSC	- Implementing projects and measures in accordance with Rosseti PJSC's Climate Change Policy; - Considering environmental and climatic aspects in investment decisions, design and construction of new power grid facilities, upgrade and renovation of equipment; - Developing the environmental and energy management system; - Ensuring closer control of environmental safety as part of the occupational, industrial, fire and environmental safety management system; - Implementing the policy on energy saving and energy efficiency in accordance with ISO/GOST R ISO 50001 standards.	- inventorying emission sources, quantitative assessment and verification of the results of assessing direct and indirect greenhouse gas emissions - Supervisory audit of Rosseti PJSC's environmental management system to ensure compliance with the requirements of ISO/GOST R ISO 14001 standards - FKPI: Innovation performance - FKPI: Absence of significant accidents in power grids investigated by the Federal Environmental, Industrial and Nuclear Supervision Service (Rostekhnadzor)
10	Biodiversity	Potential negative impact on the environment: - Decline in biodiversity in the regions of operation, ecosystem disturbance Actual positive consequences: - supporting terrestrial ecosystems through compensatory reforestation - preserving biodiversity through installing bird guards - supporting aquatic ecosystems through stocking water bodies with fish	Long-term	Local communities, employees, government agencies, consumers, non-profit organizations, future generations	- Environmental Policy of Rosseti PJSC - Regulations on the Environmental Management System of Rosseti PJSC; - Regulations on the Occupational Health and Safety Management System of the Rosseti Group - Organizational standard "Bird Guards for Overhead Power Lines and Outdoor Switchgear. General Specifications" - Organizational standard "Bird Guards for Overhead Power Lines and Outdoor Switchgear. Acceptance Rules and Testing Techniques" - Organizational standard "Bird Guards for Overhead Power Lines and Outdoor Switchgear. User Guidelines"	- Compliance with legal requirements when preparing project documentation, materials, research, etc. - Implementing measures to prevent and mitigate potential negative environmental impacts, including the protection of plants and animals and their habitats, with particular attention to endangered species - Releasing fish fry into water bodies - Performing compensatory reforestation - Taking measures for grid connection of new treatment facilities on the shore of Lake Baikal - Supporting environmental research	- Conclusions of the state environmental expert review of project documentation for facilities - Supervisory audit of the environmental management system to ensure compliance with the requirements of ISO/GOST R ISO 14001 standards - Annual state environmental control and monitoring of the impact of the power grid sector on ecosystems

TABLE OF IMPACTS OF THE ROSSETI GROUP

№	Material topic	Actual and potential, negative and positive impact on the economy, environment and people			Policy or commitments in relation to the material topic are enshrined in the following corporate documents:	Actions taken to manage the topic and associated impacts, including: i. actions to prevent or mitigate potential negative impacts; ii. actions to remedy actual negative impacts, including support and cooperation in remedial work; iii. actions to manage actual and potential positive impacts.	Measures to track the effectiveness of the actions taken: i. processes used to track the effectiveness of the actions; ii. goals, targets and indicators used to measure the progress.
		i. Impact type and description	ii. Time frame for risk or opportunity realization	iii. Type of resource or a stakeholder affected by risk/opportunity realization			
11	International cooperation	Potential negative consequences for the economy: • lagging behind foreign companies in terms of technologies • strategic planning based on incorrect scenarios of global industry development • missed economic benefit	Medium-term	Government bodies, investors and shareholders	• Development Strategy of Rosseti PJSC, its subsidiaries and affiliates until 2030 • Rosseti PJSC Regulations on the Uniform Technical Policy • Sustainability Policy of Rosseti PJSC • Innovative Development Policy of Rosseti PJSC	• Implementing the best international practices in the Company's internal processes • Developing cooperation in technology • Exchanging experience and vision for the future of the industry • Participating in international forums and conferences	• Analyzing compliance of the Company's practices with global standards • Analyzing operational and performance indicators compared to peer companies
12	Climate impact and climate change adaptation measures	Potential negative impact on the environment, people and the economy: • irreversible changes in ecosystems • deterioration in living conditions for people • costs related to adapting to new climatic conditions Actual negative impact on people and the economy: • disruption of electricity supply due to natural disasters	Long-term	Local communities, government agencies, consumers, future generations	• Climate Change Policy of Rosseti PJSC • Sustainability Policy of Rosseti PJSC	• Monitoring greenhouse gas emissions and taking measures to reduce them • Developing and implementing programs to enhance the reliability of the power grid sector in certain regions • Participating in tree planting events as part of reforestation campaigns • Creating backup capacities in regions with a high risk of climate anomalies • Developing the electric vehicle charging infrastructure and promoting electric vehicles • Reducing the consumption of fuel and energy resources for the Company's needs • Connecting renewable energy generation facilities • Considering climate when forming the Company's development strategy • Considering climate when planning new infrastructure • Ensuring effective management of climate risks	• KPI: Timely approval of climate zone maps • FKPI: Absence of significant accidents in power grids investigated by the Federal Environmental, Industrial and Nuclear Supervision Service (Rostekhnadzor)

№	Material topic	Actual and potential, negative and positive impact on the economy, environment and people			Policy or commitments in relation to the material topic are enshrined in the following corporate documents:	Actions taken to manage the topic and associated impacts, including: i. actions to prevent or mitigate potential negative impacts; ii. actions to remedy actual negative impacts, including support and cooperation in remedial work; iii. actions to manage actual and potential positive impacts.	Measures to track the effectiveness of the actions taken: i. processes used to track the effectiveness of the actions; ii. goals, targets and indicators used to measure the progress.
		i. Impact type and description	ii. Time frame for risk or opportunity realization	iii. Type of resource or a stakeholder affected by risk/opportunity realization			
13	Industrial waste management	Potential negative consequences for the environment and people: - soil, water and groundwater pollution - negative impact on human health	Long-term	Local communities, employees, government agencies, consumers, non-profit organizations, future generations	- Environmental Policy of Rosseti PJSC - Regulations on the Environmental Management System of Rosseti PJSC - Regulations on the Occupational Health and Safety Management System of the Rosseti Group	- Keeping records of waste generation and movement - Using absorbent materials and environmental neutralizers for petroleum products - Delivering industrial and post-consumer waste to specialized organizations for subsequent disposal, treatment and burial - Preparing waste accumulation sites for separate storage of waste of different hazard classes in the territory of production facilities	- Conducting audits to ensure compliance with ISO/GOST R ISO 14001 standards - Annual inspections by the Federal Service for Supervision of Natural Resources
14	Focus on consumers	Actual positive impact on the environment, people and the economy: - improving the quality of life; - improving the quality and availability of services through the implementation of customer service Potential negative consequences for people and the economy: - causing harm to human health, including a threat to life - social unrest - damage to property and equipment; - a threat to national security - significant property damage - irreversible disruption to continuous production processes - missed economic benefit	Long-term	Consumers, local communities, government agencies, suppliers and counterparties	- Development Strategy of Rosseti PJSC, its subsidiaries and affiliates until 2030 - Innovative Development Policy of Rosseti PJSC - Innovative Development Program (IDP) for the period from 2024 through 2029 with an outlook until 2035 - Rosseti PJSC Regulations on the Uniform Technical Policy - Uniform Consumer Service Quality Standards of the Rosseti Group	- Ensuring that infrastructure and services are available to all categories of consumers - Improving service quality - Introducing the backbone local grid operator (BLGO) status - Implementing uniform quality standards for services provided to consumers - Implementing tariff regulation measures - Implementing digital solutions and new customer services for consumers - Establishing the Cybersecurity Center to protect information infrastructure, including consumer data	- Conducting a comprehensive survey of customer satisfaction with the service level and quality - Conducting comprehensive assessment of customer satisfaction - KPI: Timely completion of the plan for reviewing applications for grid connection

TABLE OF IMPACTS OF THE ROSSETI GROUP

№	Material topic	Actual and potential, negative and positive impact on the economy, environment and people			Policy or commitments in relation to the material topic are enshrined in the following corporate documents:	Actions taken to manage the topic and associated impacts, including:	Measures to track the effectiveness of the actions taken:
		i. Impact type and description	ii. Time frame for risk or opportunity realization	iii. Type of resource or a stakeholder affected by risk/opportunity realization			
15	Digital technologies	Actual positive impacts on the economy and people: • optimizing operating costs • developing new services and diversifying the business Potential negative consequences for people and the economy: • increase in cyber risks and vulnerabilities in critical infrastructure • decline in traditional jobs and the need for large-scale retraining of staff	Medium-term	Government agencies, consumers, investors and shareholders, employees, suppliers and counterparties	• Digital Transformation Strategy of the Rosseti Group for the period of 2025–2027 and forecast indicators until 2030 • Innovative Development Policy of Rosseti PJSC • Rosseti PJSC's Innovative Development Program (IDP) for the period from 2024 through 2029 with an outlook until 2035	• Implementing a unified information environment based on Russian platforms and modern IT infrastructure • Implementing and developing intelligent power grid management systems based on digital technologies and automated remote monitoring systems • Using digital equipment which complies with information security requirements • Implementing projects in the areas such as digitalization, technological independence (software and hardware), and the security of critical information infrastructure facilities across various areas of business • Ensuring a high level of technological and information security, including critical information infrastructure facilities	• Assessing integration of digital technologies into business processes • Assessing resilience of the internal IT infrastructure to external impacts • Ensuring continuous collection and analysis of real-time data to assess the effectiveness of digital solutions
